Functional neuroimaging, including MRI (fMRI) and other modalities, has been one of the fastest growing fields of human neuroscience and the idea of having a research-dedicated MRI scanner is with us for at least a decade. We almost had one a few years ago, but then we didn’t, and those of us who use fMRI as a critical tool in their research, had to travel around the country, and enjoy the hospitality of our colleagues in hospitals and at the Weizmann institute. These days are gone! The Siemens Skyra 3T scanner is now being installed at its new home at the Hi-Tech village at the Edmond J. Safra campus. For more information, pictures and videos, please see our blog [1].

It is now widely accepted that deciphering the enigma of the brain is the most challenging intellectual endeavor of the 21st century, "The Century of the Brain" - Join our quest and become a friend of ELSC.

**ELSC Friends**

**Studying at ELSC**

Our Int'l Ph.D. program provides outstanding students with top-notch courses in computational neuroscience.

**The Building**

The Jerusalem Brain Sciences Building will provide a state-of-the-art research and teaching facility for the Edmond and Lily Safra Center for Brain Sciences.

**ELSC Media Channel**

Get into our media channel and investigate ELSC's latest videos: seminars, public lectures, courses and video articles.
