Prof. Haim Sompolinsky, a leading brain sciences researcher at the Hebrew University of Jerusalem, was last week awarded the $25,000 Swartz Prize for Theoretical and Computational Neuroscience from the US Society for Neuroscience.

Sompolinsky, of the Edmond and Lily Safra Center for Brain Sciences, was commended for producing a significant cumulative contribution to theoretical models or computational methods in neuroscience. The award was presented during society's annual meeting in Washington.

The society comprises more than 41,000 researchers and clinicians who study the brain and nervous system.

"The society is pleased to recognize the exceptional contributions of Dr. Sompolinsky to the field of theoretical neuroscience," said Dr. Susan G. Amara, the society's president.

"His work, blending physics and neuroscience, has established innovative methods and set rigorous standards for advancing the field."

Sompolinsky has worked throughout his career to develop the field of theoretical neuroscience, helping to shape system-level brain theory using principles and methods of statistical physics and dynamical systems. Sompolinsky's "ring" model has served as a key paradigm for modeling neural circuits and has
been the basis of countless studies of short-term memory, decision-making, selectivity and receptive fields.

He previously received several prestigious awards, including the Landau Prize for Brain Science and the Hebrew University President’s Award for Outstanding Research. He is a foreign honorary member of the American Academy of Arts and Sciences.

It is now widely accepted that deciphering the enigma of the brain is the most challenging intellectual endeavor of the 21st century, "The Century of the Brain" - Join our quest and become a friend of ELSC.

**Studying at ELSC**

Our Int'l Ph.D. program provides outstanding students with top-notch courses in computational neuroscience.

**The Building**

The Jerusalem Brain Sciences Building will provide a state-of-the-art research and teaching facility for the Edmond and Lily Safra Center for Brain Sciences.
Get into our media channel and investigate ELSC’s latest videos: seminars, public lectures, courses and video articles.
