ELSC-ICNC Seminar: Josef Parvizi

April 11, 2013

On the topic of: "Re-examining category specific representations in the human visual system by intracranial recordings and electrical brain stimulation in conscious human subjects"

ELSC & ICNC cordially invite you
to the lecture given by:

Josef Parvizi
Stanford Medical School

On the topic of:
"Re-examining category specific representations in the human visual system by intracranial recordings and electrical brain stimulation in conscious human subjects"

The lecture will be held on Thursday, April 11, 2013
at 17:00, at ELSC-ICNC: Silverman Bldg., 3rd Wing, 6th Floor, Edmond J. Safra Campus

Light refreshments at 16:45

Abstract:

Functional imaging and earlier electrophysiological studies have established category specific activations in the ventral occipitotemporal cortex for some categories of visual objects. In this talk, I will present new data from our multimodal electrocorticography (ECoG), high-resolution fMRI, and electrical brain stimulation studies where we have studied the correlative activations as well as their causal role in the visual perception of various categories of objects including faces, words, and numerals.
It is now widely accepted that deciphering the enigma of the brain is the most challenging intellectual endeavor of the 21st century, "The Century of the Brain" - Join our quest and become a friend of ELSC.

Studying at ELSC

Our Int'l Ph.D. program provides outstanding students with top-notch courses in computational neuroscience.

The Building

The Jerusalem Brain Sciences Building will provide a state-of-the-art research and teaching facility for the Edmond and Lily Safra Center for Brain Sciences.

ELSC Media Channel

Get into our media channel and investigate ELSC's latest videos: seminars, public lectures, courses and video articles.
