Excerpts from the University Regulations Governing Post-Doctoral Fellows:

1. Post-doctoral research will be conducted under the supervision of a Faculty member.

2. All Post-Doctoral Fellows will be registered as such in the Department of Student Administration.

3. A postdoctoral fellowship must commence within 5 years of obtaining the PhD degree. A post-doctoral fellowship may be awarded for a period not exceeding four years. Grants that are awarded by the University Fellowships Committee are for the duration of one year, with the possibility of extension for one additional year only.

4. Grants are intended to enable Post-Doctoral Fellows to devote themselves exclusively to their research.

5. The award of a grant may not be made conditional upon the performance of any work whatsoever other than the post-doctoral research in which the post-doctoral fellow is engaged.

6. As a rule, the University will not terminate a post-doctoral fellowship prior to the predetermined term of the fellowship. In exceptional cases, however, a fellowship may be terminated at an earlier time, subject to the approval of the Dean and for reasons given in writing. In that event, the Fellow will be given two months advance notice of termination.

7. Questions concerning the possibility of obtaining permission to engage in other work should be addressed to the person responsible for post-doctoral fellows in the Department or the Faculty. Employment within the Hebrew University shall be for pay and not on a voluntary basis.

8. All the intellectual rights pertaining to any invention developed by a Fellow as a result and/or in the
course of his/her research work at the Hebrew University and/or resulting from the use of university laboratories or property shall entirely belong to the University. The Fellow will be entitled to royalties deriving from patent registration of any such invention, as prescribed in the University regulations.
