"Emergence of Functional Subnetworks" My research interests are in the field of neuroscience, especially insofar as it addresses the questions of learning and memory. I use mathematical and computational tools to model synaptic plasticity, and to study its functional implications in artificial neural networks.

ELSC cordially invites you to the lecture given by:

Dr. Claudia Clopath
The Imperial College London

On the topic of:

?Emergence of Functional Subnetworks?

The lecture will be held on Thursday December 1st, at 17:00

at ELSC: Silberman Bldg., 3rd Wing, 8th Floor,

Edmond J. Safra Campus

Light refreshments served at 16:45

Abstract:

My research interests are in the field of neuroscience, especially insofar as it addresses the questions of learning and memory. I use mathematical and computational tools to model synaptic plasticity, and to study its functional implications in artificial neural networks.

It is now widely accepted that deciphering the enigma of the brain is the most challenging intellectual endeavor of the 21st century. "The Century of the Brain" - Join our quest and become a friend of ELSC.

Studying at ELSC

Our Int'l Ph.D. program provides outstanding students with top-notch courses in computational neuroscience.

The Building

The Jerusalem Brain Sciences Building will provide a state-of-the-art research and teaching facility for the Edmond and Lily Safra Center for Brain Sciences.
