"Art and Brain Week" is a unique collaboration between the Edmond and Lily Safra Center for Brain Sciences (ELSC) at the Hebrew University and the Jerusalem Cinematheque, Mazya House, Tzuba Hotel, The Jerusalem Brain Community and Hamiffal. It takes place as part of the international "Brain Awareness Week".

The purpose of the "Brain Awareness Week", marked annually in March, is to raise public awareness to the importance of brain research and present research advances in the field. ELSC's "Art and Brain Week"
promotes this goal while strengthening the relationship between community and academia.

**The "Art and brain week" will take place on March 12-19, 2017.** During the "Art and Brain Week" a special scientific event will be held every evening at the Jerusalem Cinematheque and will include a lecture by a leading neuroscientist who is at the forefront of research, and a screening of a film related to the lecture.

On Thursday, March 16, 2017, a special improvised comedy show, PROVIZORI, with Dvir Bendek, Tomer Sharon, Hila Di Castro and Eran Ivanir, will be presented after the lecture. On Friday, March 17th, Prof. Adi Mizrahi will present a talk about smell and taste, followed by a rich brunch at the Tzuba Hotel. On Saturday, at "Hamiffal" three short talks will be given by advanced students from The Jerusalem Brain Community. An additional special event will be held on March 19th at the Mazya House and will include a lecture about The Human Genome Project and a theater performance by the Theater Company Jerusalem.

In addition, starting March 12th, a unique art exhibition, "Brain Sciences | Not a Child's Play", created under the guidance and inspiration of the artist Hanoch Piven will be displayed at the Jerusalem Cinematheque until April 30.

Every evening, before the lecture and film, different laboratories from the Edmond and Lily Safra Center for Brain Sciences will present their latest discoveries in the field of brain research. These presentations in the Cinematheque lobby will be presented to the public by ELSC’s promising young scientists.
