Re: Job Offer (Freelance Researcher)

51Blue is a Start-up company, focused on Training Emotional Intelligence. Training Seminars and The Comprehensive 51Blue Training App? are expected to be launched in 2018. 51Blue is based on the Psychological Theory and Training Methodology developed by founder Gino Gross (MSc, MA, PGC, Rabbi).

51Blue is currently seeking a Freelance Researcher (Not Lab based), to identify publications and ongoing research in Neuroscience directly related to the 51Blue Psychological Theory. The applicant will be working directly with Gino Gross. Results will endeavour to validate the 51Blue Psychological Theory, contribute to further developments of the Theory, and point to opportunities of collaboration with existing Research Labs, Authors of Publications, and Academic Bodies.

15 years of psychotherapy practice and research, by Gino Gross, have been focusing on the connection between Human Behaviour and accompanying specific changes in a) Somatic Emotional Experiences b) Bodily Functioning (e.g. Quality of Breath and Muscles Tone), and c) Types of Thinking and Concentration.

The result is a Psychological Theory identifying 5 distinct Emotional States, linking all the above areas.

51Blue is now particularly interest in the connection between these 5 Emotional States and the activation of specific Brain Centres, particularly the Brain's Limbic System (Reward System, Fight and Flight System) and the Default Mode Network.

Additional future efforts will focus on the connections between these 5 Emotional States and the activation of the Sympathetic and Parasympathetic Nervous System, as well as the connections between these 5 Emotional States and Hormonal changes.

The applicant will have a special interest in Human Behaviour, Emotional Intelligence, and Brain Science. The applicant will be at least at Masters level, preferably hold a PhD in Neuroscience, and have research experience in related areas.
background. An interest in the use of technology to increase Emotional Intelligence will be an added advantage.

(This Freelance Research Job, is an ideal ?side job?, in addition to other existing bigger commitments. Since the research is not lab based, workplace and work-hours are completely flexible. It is anticipated to start with a few hours per week).

To apply or for further information please contact:

Gino Gross on 054 9034259 or by email at 221a221b@gmail.com
