A postdoctoral position is available in the field of system neuroscience under the supervision of Prof. Yifat Prut. The Prut's lab has an extensive experience in studying motor control of voluntary movements, recording of brain and muscle activity in behaving animals and studying network interactions using state of the art experimental and computational tools. The successful candidate will join an ongoing and funded collaboration between the Hebrew University and Rockefeller University, which aims at deciphering the way multiple motor areas operate in an orchestrated manner to control socially-relevant facial expressions.

**Requirements:**
Candidates must hold a PhD degree in Biology or related disciplines. Further background in electrophysiology, and computational tools is an advantage.

**Further details:**
**Possible start of employment:** Flexible
