A postdoctoral position is available in the field of physiology and behavior under the supervision of Prof. Ami Citri. The Citri lab is combining a powerful toolkit of molecular, anatomical, physiological and behavioral approaches to decipher the physiology and function of the claustrum.

The successful candidate will join the claustrum team in the lab and develop an ambitious project aimed at identifying the principles governing cortical modulation by the claustrum and its functional impact on behavior.

Requirements:
Candidates must hold a PhD degree in Neuroscience or a related discipline and have a deep interest in physiology and behavior. Published experience in electrophysiology, rodent behavior and imaging is an advantage. Candidates should be proficient in English.

Further details:
Possible start of employment: Flexible.
