Movie: **Ralph Breaks the Internet**, 2018

All lectures will be conducted in Hebrew

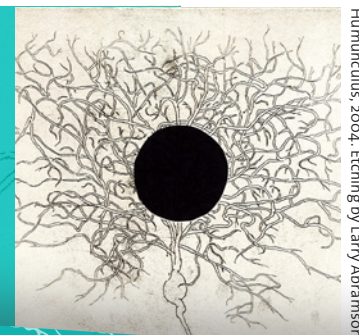

The Young Scientists

Every evening between 19:45-20:30 young researchers from the Edmond and Lily Safra Center for Brain Sciences at the Hebrew University will present their latest studies in the halls of the Cinematheque.

Etchings from the Brain

11 Brain researchers and 10 Israeli artists gathered together at The Gottesman Etching Center in Kibbutz Cabri for three exciting and inspirational days. During those days they heard lectures and had discussions about art, brain and what's in between. As a result, every artist created two prints that are presented in this unique exhibition, which was displayed for the first time at The Israel Museum 13 years ago, and is now open again for the public to enjoy.

Opening: 24.3.2019

Humunculus, 2004. Etching by Larry Abramson
